

**JOHN VEGA**

WEB APP DEVELOPER

## Summary:

Self-taught web application developer with nearly two years of experience in JavaScript and PHP. Learned programming through platforms like YouTube, W3Schools, and FreeCodeCamp. Currently studying Python with a focus on cybersecurity, and exploring advanced technologies such as Symfony, Vue.js, Docker, and Kubernetes. Proficient in Linux tools such as BASH and NANO. Enthusiastic about collaborating and continually expanding my skills in the dynamic field of technology.

## Key Skills:

- Self-motivated learner with a robust foundation in web development.
- Experience with educational platforms such as YouTube, W3Schools, and FreeCodeCamp for continual skill development.

## Experience:

### Current – Present

Developed and maintained a custom PHP framework using the MVC (Model-View-Controller) pattern and object-oriented programming (OOP) principles.

- Designed software architecture to ensure scalability and modularity.
- Implemented key features such as URL routing, session management, user authentication, and database access.
- Experimented with new technologies and development practices to enhance code efficiency and quality.

This project provided practical experience in software development, allowing me to apply and expand my knowledge in web programming, software architecture design, and coding best practices.
